

Action plan submitted by Pınar NAZ ÇELİK for Yalova Cumhuriyet Ortaokulu - 21.02.2022 @ 17:06:33

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › It is important that your ICT services are regularly reviewed, updated and removed if no longer in use. Installing the latest versions and patches often addresses security vulnerabilities without which your services might come under attack. Ensure that this is part of the job description of the ICT coordinator.

Pupil and staff access to technology

- › Consider whether banning mobile devices is a rule that is fit for purpose and if your school might want to allow digital devices for some class activities. You could develop as part of your Acceptable Use Policy a section on how digital technologies can and cannot be used in the classroom; see the fact sheet on Using Mobile Phones at School (www.esafetymail.eu/group/community/using-mobile-device-in-schools).

Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

Software licensing

- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

IT Management

- › In your school only the head master and/or IT responsible can acquire new software. Consider putting a system into place where teachers can ask for new software in a non-bureaucratic and timely fashion. This allows teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

Policy

Acceptable Use Policy (AUP)

- › In your school policy issues are regularly discussed. This is good practice as it ensures staff and pupils are aware of them. Do pupils and staff also have to sign related documents to confirm their awareness?
- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.
- › It is good that school policies are reviewed annually in your school. Ensure that they are also updated when changes are put into place that could affect them. All staff should be aware of the contents of the policy.

Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.

Staff policy

- › It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the [My school area](#).

Pupil practice/behaviour School presence online

- › We recommend that you specifically nominate a web-experienced staff member to periodically check the school's online reputation. Monitoring such an important aspect on an ad hoc basis only is insufficient. Remember that this is the image that prospective parents will receive when they search for your school online.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetymodel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetymodel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

Practice

Management of eSafety

- › It is good that you have a designated member of staff responsible for eSafety. Consider whether it would be helpful to have an eSafety committee comprising members from all groups of stakeholders. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetymodel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetymodel.eu/group/community/embedding-online-safety-in-curriculum.
- › Sexting is an issue which affects many young people. Sharing possible consequences and risks with them is important, as is the opportunity for some discussion around the issue. Sexting should be part of a broad and balanced eSafety curriculum.

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school.
- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to info-insafe@eun.org.
- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).

Sources of support

- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?
- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetylabel.eu/group/community/suggestions-for-online-training-courses.

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
